CorrPro® Rotary Joint

Upgrade and Rebuild Kit

The CorrPro cartridge upgrade kit eliminates steam cutting and increases robustness to thermal cycling in CorrPro rotary joints. The pre-assembled kit is housed in a durable steel body with a stainless steel piston and dual O-ring secondary seals. The cartridge design is a drop-in upgrade to existing CorrPro rotary joints that experience thermal cycling and operate under 200 psi (13.8 bar).

	Standard CorrPro Rotary Joint	Upgraded CorrPro Rotary Joint
Body	Steel	Steel
Piston	Ductile Iron	Stainless Steel
Secondary Seal	Cup Seal	Dual O-ring
Seal Ring	Antimony Impregnated	Antimony Impregnated
Operating Pressure	Up to 300 psi (20.7 bar)	Up to 200 psi (13.8 bar)
Operating Temperature	Up to 450°F (232°C)	Up to 400°F (204°C)

Features

- Durable stainless steel piston
- Dual O-ring secondary seal
- Factory assembled cartridge
- OEM genuine components
- All necessary seals, O-rings, and lube

Benefits

- Resistant to corrosion and steam cutting
- Robust seal during thermal cycling
- Faster rebuild time
- Reliable and durable performance
- Eliminates missing parts and re-orders
