

PTX[®] Steam Joint Upgrade and Rebuild Kit

Upgrades PTX Steam Joints to PT2X™ Technology

PTX steam joints can be upgraded to PT2X technology with a PT2X cartridge and wear plate kit. Benefits include easy planned maintenance and increased durability. The kits are backward compatible with PTX steam joints and returns both PTX and PT2X steam joints to “like new” condition by replacing all wear components, including the seal cartridge, seal ring, and wear plate.

Note: Support tube O-ring also included in kit

Features

- PT2X visual wear indicator
- PT2X protective shroud
- Reverse compatible with PTX steam joints
- OEM genuine components
- Contains all wear components
- Contains all seals, O-rings, and lube needed
- Factory assembled cartridge
- Eliminates mis-inspection of worn parts
- Free of solvent and wire brush cleaning

Benefits

- Planned maintenance
- Increased durability
- Upgrade to PT2X technology (160 psig only)
- Reliable and durable performance
- Restores “like-new” condition
- Eliminates missing parts and re-orders
- Faster rebuild time
- Ensures all worn parts are replaced
- Clean, environmentally friendly repair
